Skills

Linux Administration 95%

Vulnerability Assessment 90%

Penetration Testing 85%

Network Security 80%

Digital Forensics 70%

Tools & Technologies

- Nmap
- Wireshark
- Burp Suite
- Metasploit
- Kali Linux
- Windows
- Mac
- Social Engineering

Languages

- English
- Nepali
- Hindi

Profile

Passionate and motivated Cybersecurity Enthusiast with a strong interest in protecting systems, networks, and data from modern digital threats. Skilled in vulnerability assessment, penetration testing, network security, and security tools. Experienced in developing security tools and monitoring systems to identify, analyze, and mitigate security risks. Eager to learn, adapt, and contribute to building secure and resilient cyber environments.

Projects

1. Python-Based Vulnerability Scanner

- Scans target systems to identify open ports and active network services.
- Detects software versions and matches them against known CVE vulnerabilities.
- Generates detailed vulnerability reports with severity levels and remediation suggestions.
- Uses Python libraries such as Nmap, Socket, and Requests for automation.

2. Intrusion Detection System (IDS)

- Monitors network traffic in real time to detect suspicious or malicious activities.
- Analyzes packets using predefined rules or anomaly-based detection techniques.
- Generates alerts for attacks such as port scanning, brute-force attempts, and DDoS.
- Stores logs and provides dashboards for security monitoring and incident analysis.

3. Malware Analysis Tool

- Performs static analysis by extracting file hashes, strings, and metadata.
- Conducts basic dynamic analysis to monitor processes, registry changes, and network activity.
- Identifies Indicators of Compromise (IOCs) and suspicious malware behavior.
- Produces a comprehensive malware analysis report with security recommendations.

4. Network Scanning Tool

- Discovers live hosts and devices connected to a network.
- Scans TCP and UDP ports to identify available services.
- Detects operating systems and service versions through fingerprinting techniques.
- Generates a network inventory report to assist in security assessments and auditing.

Education

Bachelor of Computer Science (Hons) (Network Technology and Cybersecurity)
Lincoln University College, Kota Bharu, Malaysia

2024 - Present

- Currently pursuing a degree with focus on cybersecurity and networking.

Higher Secondary Education (10 +2)

NEB Board, Nepal

2021 - 2023

- Computer Science - GPA: 3.45

Certifications

- Certified Ethical Hacker (CEH)
- Offensive Security Certified Professional (OSCP)
